

## WE ARE **COHERE**

We bring the life-changing power of community to the world by creating places and cultivating relationships that inspire people to find purpose, live authentically, and thrive together.

We firmly believe that when communities are built and cared for with your experience in mind, trust expands, happiness increases, and lives are enriched.

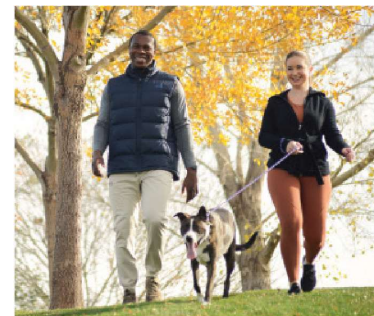

We know strong partnerships are foundational to our shared success. We put great value on building connection and working together to intentionally build community.

## YOUR COMMUNITY'S **MANAGEMENT COMPANY**

Your onsite Cohere team partners with you and your board members to cultivate an enriched and purposeful community that grows in value over time.

We are innovators and trailblazers within the marketplace, putting equal emphasis on communications, operations, engagement, and financial success.

We integrate education with practical tools to empower residents and foster collaboration.

## HOW WE'RE **DIFFERENT**

We encourage connections through unique programming, resident-led clubs, and community events.

Open communication is our top priority — we're committed to creating a space where your voice matters.

We make understanding your community simple. Through the resident website and e-blasts, we break down association topics so you can navigate living in your community with ease.
